## Summary

I'm a software developer with three years of programming experience. I primarily work with TypeScript and React, but I'm also proficient in Python, JavaScript, and PHP.

I help businesses design and build fully functional frontend and backend applications using the Next.js, Django, and Nest.js frameworks. I'm also familiar with popular technologies like Git, Docker, PostgreSQL, MySQL, NoSQL, and MongoDB.

Are you hiring for a new role? Let's hop on a call and discuss what I can do for you.

## Experience

### Frontend React Native Developer

QuartzByte

Dec 2024 - May 2025 (6 months)

I worked closely with a graphics designer to translate mockup designs from Figma into code.

I integrated OS Maps into React Native using Next.js as a proxy to serve map tiles

I worked closely with the backend developer to ensure APIs worked seamlessly

### Full Stack Javascript Developer

NetraScale

Sep 2023 - Dec 2024 (13 months)

I analysed different APIs for performance so we can integrate them into a risk act app. I analysed their speed, performance, and whether they return any data. At the moment, I'm trying to fetch data from the OpenAI API to find out how organisations can use it.

I've tested APIs from Microsoft Teams, Slack, Twilio, Zoom, ChatGPT, and Dropbox. Other APIs I've worked on include Jira Confluence, Google API, Redis, Lucene, and Apache Solr.
